THE NEXT PRESIDENT’S CENTENNIAL DINNER WILL BE IN LIVERPOOL ON TUESDAY 25TH OCTOBER 2016

WEDNESDAY, 2 DECEMBER 2015 • CAVALI WINE AND STUD FARM SOMERSET WEST, CAPE TOWN, SOUTH AFRICA
Consider anew how a small, committed group of men and women overcame enormous significant challenges to create the first global organisation to fight TB.

José Luis Castro
The most accurate test for TB infection

**QuantIFERON®-TB Gold Plus (QFT®-Plus)** provides the accuracy that clinicians demand with the convenience of a single patient visit.

QFT-Plus is an improved version of the market-leading IGRA, QuantIFERON-TB Gold. The test uses the same principle, test procedures, and reliable technology, but it is now optimized with innovative tuberculosis-specific antigens that elicit both CD8+ and CD4+ T-cell responses – enabling a more accurate assessment of cell-mediated immune response to TB infection (1).

Ask us how QFT-Plus can help you simplify TB screening or visit www.QuantiFERON.com/Plus for more information.

**ACCESS TO MEDICINES**

Caring for the most disadvantaged

Sanofi created the Access to Medicines Department to improve access to healthcare in the poorest countries. This dedicated department develops, with its partners, sustainable solutions to promote quality healthcare and provide medicines at preferential prices for the most disadvantaged patients. Our programs focus on disease areas where Sanofi has recognized expertise: malaria, tuberculosis, neglected tropical diseases, mental disorders and epilepsy.

**The Union is grateful to the following organisations that are corporate sponsors of the Union centennial campaign.**

**Sample to Insight**
The Union is grateful to the following individuals and organisations who have made contributions to the Centennial Campaign.
