The most accurate test for TB infection

**QuantiFERON®-TB Gold Plus (QFT®-Plus)** provides the accuracy that clinicians demand with the convenience of a single patient visit. QFT-Plus is an improved version of the market-leading IGRA, QuantiFERON-TB Gold. The test uses the same principle, test procedures, and reliable technology, but it is now optimized with innovative tuberculosis-specific antigen that elicit both CD8+ and CD4+ T-cell responses – enabling a more accurate assessment of cell-mediated immune response to TB infection (1).
